| <b>Purpose</b><br>Bring reliable electricity, clean water, and internet to off-grid Palestinian communities in Area C of the West Bank.                                                                                                                                                                |                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                       | <b>Impact</b><br>Communities meet basic needs and build resilience against displacement: children stay connected to online education, farmers and herders stay productive.                                                                    |                                                                                                                                                                                                                                      |
| <b>Problem</b><br>No access to the national electricity grid, clean water, or internet. Building permits for Palestinians in Area C are almost never granted (~99% rejection rate). Self-built systems risk confiscation or demolition as 'illegal construction'. Ongoing risk of forced displacement. | <b>Solution</b><br>Off-grid renewable energy (solar & wind), clean water systems, wireless broadband internet, and livelihood support — integrated into one service.                                               | <b>UVP</b><br>The only provider combining electricity, water, internet, and livelihood support into one integrated, long-term service — built specifically for communities facing legal and political barriers to conventional infrastructure, sustained through ongoing maintenance. | <b>UA</b><br>15 years of trust and relationships across 140+ communities, plus the technical capability to install and repair off-grid systems.                                                                                               | <b>Customer Segments</b><br>Off-grid households across Area C. Farmers & herders (power/water for agriculture, dairy refrigeration). Children & students (power/internet for education). Community leaders as coordination partners. |
